

THE HOMESCHOOL RESOURCE ROADMAP COMMON CORE PROJECT

OTHER RESPONSES

I was unable to place these companies onto any of the main lists. Please make note of the reason for each company.

If you choose to contact any of these companies on your own, I recommend asking all of the following questions in order to help you discern the CCS status of its products:

Have you already altered any materials - in whole or in part - for the purpose of aligning with the CCS/NGSS? If so, which materials? What, specifically have you changed?

Do you have future plans to alter any of your materials in order to align with the CCS/NGSS? If so, which materials and what specific changes are you planning to make? When will you make the changes?

If you haven't made any content changes, have you instead chosen to correlate to the CCS/NGSS? That is, have you created public/advertising documents showing where your products - as written - happen to match particular aspects of the CCS/NGSS?

Even if the materials that you actually write/create do not align, do you use any resources from other vendors to supplement your products? If so, which products/companies? Are you aware of those companies' positions relative to the CCS/NGSS? (If you learn that a company supplements with resources from other vendors, you can check The Roadmap's lists to learn whether or not those resources are independent of, correlated to, or aligned with the CCS/NGSS.)
